

## COVID-19 Update & Dental Task Force

With the current pandemic sweeping the nation, it is time for solidarity within the dental market!

IDS is setting up a COVID-19 task force to help dentists create a contingency and recovery plan as we enter these unpredictable times.

The focus of the task force is to gather information and insight in several areas to help dentists make good business decisions to maintain the sustainability and success of their practice.

We have identified key leaders and companies that will provide insight and solutions in the following areas:

- Financial impact and options
- Human Resources impact and options
- Accounting impact and options
- Legal insights
- Maintaining your practice culture
- Managing the unknown with your team
- Patient communication and planning
- Supply chain and product disruption and options
- Operations contingency and recovery planning
- Other ad-hoc guests

We want to gather ideas and strategies from others across the country and share those with our social media outlets and channel partners to ensure we are all working together to meet the challenges we are all facing. In order to disseminate the information and answer any questions, we are going to use the following avenues:
