Investig8 Tool

Download Guide

How to download and run the Investig8 Tool

- 1. Click the "Download Here" button.
- 2. Your browser will either save the file to your download folder or ask you where to save the download.
- 3. On Microsoft Edge, if you encounter the following warning, click on the "..." menu and choose "Keep":

4. Then on the next screen, click "Show more", then click on "Keep anyway".

- 5. Once the download is saved, Open the Investig8_Tool.exe file by clicking on the download or file.
- 6. If you get the message "Windows protected your PC", click on the "More info":

7. Then click on "Run anyway":

8. When the Investig8 Tool opens, enter your Company Name, City and two letter State abbreviation:

9. Look at the Detected User. If you have a different username and password that you would like to use that has Local Admin rights on all computers, click on "Set User Manually" and enter the username and password:

Detected User	
ED-SLS\Ed *Please verify the detected user (above) has Local Admin rights on all computers. Otherwise, please set the user credentials manually by clicking below.	
Set User Manually	
Reset to Detected User	
Username: Password:	Computer\User

10. Once your information is entered, click on the "Launch Investig8" button.

- 11. The Investig8 Tool will gather information about the devices and computers connected to your network.
- 12. When the Tool is finished, it will display a dialogue that says, "The investigation was successful!".
- 13. When the investigation is complete, close the window.
- 14. Your Sunset representative will reach out if any further information is needed.
